Video Sale INFORMATION

Video sales are a marketing mechanism that have grown in popularity due to the opportunities they present to producers who deal in large numbers of stocker and feeder cattle. Cattle are generally marketed in trailer-load lots weighing approximately 48,500 pounds; however, we can also sell "partial loads" if there are not enough cattle to make a full trailer-load. Before the sale, a representative from MACS goes to the farm to record video of the cattle while also documenting important information about the cattle including breed, frame, muscling, and fleshing as well as health and nutrition programs. ***The following catalog provides this information from our consignors and contractors to assist with marketing the consigned cattle. If you have any questions regarding the stated information, please contact a MACS representative listed throughout this catalog.***

Psalm 113:3 ***(NIV)***

You can spend a lot of time looking and not be able to find a fancier set of commercial open heifers with this much performance and style bred into them. These heifers were all born last fall and have complete birth and sire records on them. They will be weaned for 45 days at delivery and guaranteed open. They are broke to bunks and waterers and are very docile. Ms. Moore always does an exceptional job with her cattle and this group is no different. This will be an excellent group of high-quality heifers that will make fancy replacement females to turn into cows. We will sell this as one group at a per head price (not by pound).
